

The Terminal, Richmond's oldest newspaper, gives you the news you should have and will continue to protect your interests.

# RICHMOND TERMINAL

The Terminal newspaper honestly works for the best interests of the taxpayers and works for more industries and Richmond pay rolls.

VOL. XXVIII

RICHMOND, CALIFORNIA, FRIDAY, APRIL 18, 1930

No. 16

## Storm Sewer May Be Of Unit Construction

### Ford Plant to Be Taken Care of First in Order

The Richmond city council has ordered plans and specifications prepared for a combined storm and sanitary sewer system to serve the Richmond inner harbor industrial district and to be a part of a complete new system of storm and sanitary sewers at such time as it is decided to complete the project.

The outfall sewers on Fourteenth and Tenth streets, south of Dock street will be reconstructed and extended. City Engineer E. A. Hoffman has estimated the cost of the project at \$117,000 and the cost per lot in the district affected at \$4 outside of the industrial area that is directly benefited. The assessment area will extend between the bay and the northerly city limits and between First and Thirtieth streets.

The council awarded a contract to James T. Clench for installing a sewer to serve the new Filice and Perrelli cannery on Richmond inner harbor. Clench submitted the lowest of three bids. It was reported by City Manager J. A. McVittie to the council on Monday night. He offered to do the work for \$1120.28.

Other bidders were: Fred Meyer, \$1882.60, and Samuel Rogers, \$1379.

### Packing Plants Are Coming in Groups to California

Oakland, April 15.—The Cutter-Lobringier Company, with a \$400,000 investment selects this city as the site of its new plant where it will pack fruits and vegetables and employ an all-year force of 150, to be expanded during the busy seasons.

The acquisition of this plant serves to emphasize again the magnitude of the Eastbay as a packing and canning center. We have here the Libby, McNeill & Libby and Rosenberg Brothers plants on our waterfront, two of the largest in the world. Last year the Continental Can Company erected a plant at a cost of \$250,000 and the California Packing Corporation added a \$50,000 warehouse to its local facilities. The Sutter Cooperative Growers, Kings County Packing Company and B. H. Body Company, and others are in the list of new concerns in the field, building or enlarging plants. Going outside of the past twelve months, the list of canning, packing and can companies is long and imposing. The fact that so many have been added in the recent months, and that they are still coming is proof of the concentration of the industry in this shipping and distributing center of the coast.—Oakland Tribune.

### Bilingualism in Africa

#### Amusing to Americans

One of the first features to strike an American visitor to South Africa is the country's bilingualism. As he steps off the boat at Cape Town he is confronted by the double admonition, "No Smoking—Nie Rook Nie." Walking up Adderley street, principal thoroughfare of the city, he is told to "Keep to the left—Links bouden." If he wants to mail a letter back home he must buy a "stamp—posseel." If he buys more than one stamp he will find that while one is inscribed "South Africa," the next is marked "Suid-Afrika." At the railroad station he will find that the name of the city is given as Cape Town and Kaapstad, and the dining cars are labeled "Dining car—Eetzaaloon" on a railroad known both as South African railways and Suid-Afrikaanse Spoorweg. And so on. Every official or semi-official notice in the union is printed in two languages—English and Afrikaans. Meanwhile the Englishman grumbles about having to pay extra taxes to meet the cost of reprinting notices in Afrikaans, and the Dutchman wonders why the expense of using English as well as his own language should be tolerated.

The Terminal newspaper is in demand and there is a reason. The people want to know the real facts, and they are getting them in the Terminal. Hundreds of Terminals are being circulated. The Terminal telephone is busy answering calls from the paper. The Terminal has a fund of information, facts concerning the "inner workings" of city government that will be interesting reading to taxpayers. Send in your subscription now. You will get the desired information in THE TERMINAL.

### New Fish Cannery Near Winehaven To Be Modern

The proposed new fish cannery of the Golden State Packing Co., is to be located at Pt. Molate, near Winehaven.

The plant will handle all kinds of sea products, will manufacture fertilizer, fish oil and meal, poultry food, etc.

The site of the cannery will consist of about 8 acres, and is four miles from 6th street, Richmond. This distance, it is said, will guarantee no objectionable odors, as the winds come in across the bay from the southwest.

The plant is to be modern, it is declared, and the objectionable smelling features will be absent.

### Newspapers to Aid In Advertising Shell Company

The Northern California members of the Van Fleet-Durkee chain of shell gasoline service stations have decided that newspaper advertising is the best and most effective medium of conveying a "timely message to the public."

More than 100 coast newspapers are to participate in this proposed campaign, which has started this month. It is said to be the largest cooperative dealer advertising project ever put in motion.

### Falls of Niagara as

#### Pictured by Hennepin

Father Louis Hennepin saw Niagara when he went West to the upper Mississippi with La Salle's expedition in 1679. He had a poor eye for distances, for in successive narratives he measures Niagara's height as 500 and 600 feet, instead of its maximum of 162, but he had a flair for vivid word pictures:

"Betwixt the Lake Ontario and Erie there is a vast and prodigious cataract of water which falls down after a surprising and astonishing manner, in form that the universe does not afford its parallel. 'Tis true Italy and Switzerland boast of some such things, but we may well say they are but sorry patterns when compared to this of which we now speak. . . . It (the River Niagara) is so rapid above the descent that it violently hurries down the wild beasts while endeavoring to pass it to feed on the other side, they not being able to withstand the force of its current, which inevitably casts them down headlong above 600 foot. . . ."—New York Times.

### He Knew the Law

The late Haley Fluke of insurance fame told this story at an insurance men's banquet in New York.

"An American company," he said, "opened a branch in eastern Europe and was soon doing well."

"A rich peasant visited the main office one day, insured his farm, and then said to the manager:

"Now, then, sir, I must have everything plain and clear before I go. Exactly what would I get if my house and barn were to burn down tonight?"

"Not more than ten years and not less than three," said the manager.

### Veterans Must File Their Claims by July First

Oakland, April 15.—To enable ex-service men to file tax exemption claims, County Assessor Louis J. Kennedy has kept office open until 9 p. m. the past week. This service given by the assessor to many former service men who are entitled to exemption who on account of their being unable to file during the day have been unable to present their claims.

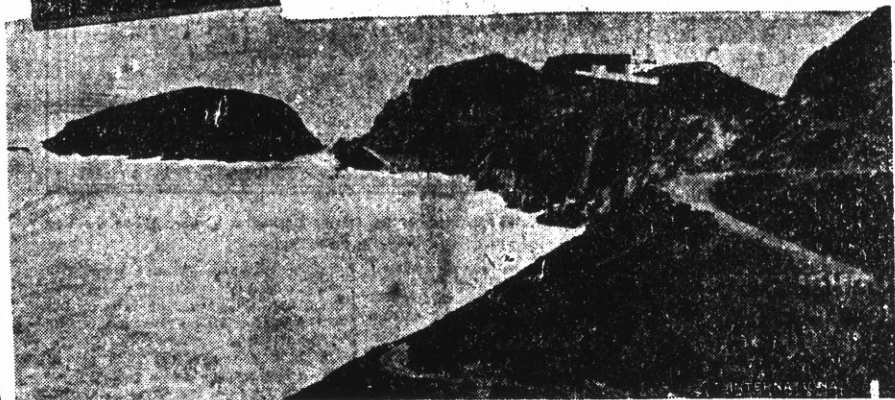

"Inasmuch as the applicant must apply in person, we intend to give these men these evenings this week."

All exemptions claims must be filed by July 1st at Kennedy's office, Fifth and Washington Streets, Oakland.

### Little Lundy Island and Its King, M. C. Harman

Here are "King" M. C. Harman, London financier, and the southern end of Lundy Island, strange principally over which he reigns as virtual absolute monarch. The piece of land, which lies in the Bristol channel, covers about one and one-half square miles and is owned by Harman, who employs all of the 14 inhabitants. Although barely 200 miles from London, the community has its own coins, its own stamps, and its own laws. The unit of Lundy coinage—the pullin—is a copper coin bearing the figure of a pullin (sea bird) on one side, and the likeness of "King" Harman on the other. The island has a church which seats nearly 200, has a peal of eight bells, and two stained glass windows.

## Some Items of Absorbing Interest to Richmond People; May Serve to Cheer (???) Them Up

To the Editor of the Terminal:

Here are two items clipped from the same columns of the San Francisco Examiner of the 15th inst., which should prove of absorbing interest to Richmond people, and serve to cheer them up in this time of suffering and distress:

### Oakland Wins 20 New Industries Within 3 Months

Marking a new period of development and expansion twenty new industries were established in Metropolitan Oakland within the past three months, according to a report made by the Oakland Chamber of Commerce.

At the same time, even greater prosperity was reflected in the announced intention of 115 business men of other sections that they had decided to come to Oakland to establish businesses and make their homes here.

In addition to the score of industries brought to Oakland, a total of 267 industrial prospects are now being interviewed, according to the Chamber of Commerce.

### Richmond Children To Enjoy Egg Hunt

Richmond, April 14.—Under the auspices of a local theatre and the Richmond Merchant's Association, the annual Easter egg hunt will be held at the First street base ball park here Sunday.

All who come to the park will be given an egg and ten dozen eggs will be hidden in the park for the children to hunt for. Of these eggs several will be marked so that the finders will receive prizes.

Here is another item clipped from the same paper at an earlier date which seems to be occupying a good deal of the time of the Board of Directors of the Chamber of Commerce. Of matter and course it is a very deep and serious should be well considered before any action is taken; but since it is proposed by Mr. Parr it seems an affront that immediate action should not have been taken.

### Foreign Trade Clubs Planned for Students

Richmond, March 2.—Organization of students in the local high school into travel study clubs is being considered by the board of directors of the Richmond Chamber of Commerce.

The plan was proposed by Fred Parr, chairman of the publicity committee of the chamber. Under Parr's plan the students would be organized into foreign trade study groups and special educational material would be prepared for their use. At intervals students would be taken to the waterfront to obtain first hand knowledge of the movements of cargo and the methods of handling it. Lecturers would tell the students the origin and destination of the cargo.

Now let us visualize the scene proposed: Our ambitious young folks, in order to get first hand information on foreign trade, go down to Mr. Parr's waterfront, take seats on boxes of Standard Oil products, and Mr. Parr delivers himself after this fashion: "You see before you this vast structure which was built by the blood and sweat of your fathers and mothers, but which was given to me by their official representatives on the City Council—an act of generosity on their part which pleased me very much—and also made me laugh. The railroads move these goods to my docks and unload it; my stevedores from San Francisco then load it aboard a ship and the ship is then towed out to the bay and from thence it sails away on its own."

We will have other lessons from time to time here on power. I want you to learn to love my property and me as well; your city council loved me well enough to give me this splendid property for fifty years, so do then likewise. Our youngsters are then so full of useful information on foreign trade that they can scarcely wait to go to the bat."

L. D. W.

THE RICHMOND TERMINAL is the oldest newspaper in Richmond, and has hundreds of readers.

### Television to Supplement Telephone; Parties Can Hear As Well as See Each Other

Two way television, to supplement the usual two-way telephone, permitting parties to see as well as hear each other, was demonstrated a few days ago in New York by the American Telephone and Telegraph Company, according to advice received today by Manager G. Calvert of The Pacific Telephone and Telegraph Company.

An experimental service between the telephone company's building at 195 Broadway and the Bell Telephone Laboratories at 463 West street, which has been in operation for some time, was disclosed and demonstrated to representatives of the press.

Following the demonstration, statements were made by Walter S. Gifford, president of the American Company, and Frank B. Jewett, vice president of the company and president of the Bell Laboratories. Mr. Gifford said, in part:

"While substantial progress has been made on the technical side, the future commercial possibilities of television are still uncertain. In line with our policy of exploring and developing every field which gives promise of possible improvements in and extension of electrical communication, we expect to continue our work in television."

### Much Disappointment in Richmond's Census Report

Richmond boosters and near boosters, who have contended that we had here in this city a population of 30,000 to 35,000, are disappointed at the final report of the census takers that the population has not reached 20,000. This reflects on our estimating faculties, and puts our advertising bodies and boastful declarations made the past four years in an embarrassing attitude. But Richmond is not the only city who has a complaint coming. There are others. Martinez is shy several thousand, and when the real figures are examined we will find that it is better to be conservative, and when guessing make our guesses elastic.

## Hundreds of Men Are Employed in State

### Two Hundred Planes Land in Oakland Each Day

The increased business of the municipally operated piers of the Port of Oakland has made possible the prediction that at the close of the fiscal year 1929 1930, the port will have a revenue surplus of approximately \$150,000. It is estimated that receipts for this year will total \$654,608. The estimated expenditures and maintenance of Port of Oakland for the fiscal year total \$499,370 32, all of which is to be derived from the port revenue.

Two hundred and twenty-eight planes land at Oakland airport each day, carrying 142 passengers and 24 students. The amount of mail carried each day is 2137 pounds or 42,740 letters, and express shipments total 25 pounds per day.

### Diet of Lions

Lions in their native habits prey largely upon young antelopes, zebras, buffalo, giraffes and other vegetation-eating animals. For this reason it is often stated that the lion will not eat the flesh of carnivorous or flesh-eating creatures. The fact seems to be that lions will eat the flesh of any animal recently killed, such as animals left by hunters. Certainly lions in captivity are not particular about the kind of flesh they eat. There is also abundant proof that the king of beasts will occasionally attack and eat human beings. Dr. W. H. H. Blair, in his book "In the Zoo," tells of two man-eating lions in Africa which carried off 18 men employed in building the Uganda railway.—Fathfinder Magazine.

### Small Potatoes

The late Haley Fluke of insurance fame said one evening in a Y. M. C. A. address in Brooklyn:

"It pays big business to be liberal. To save a dollar in a mean small way signifies the loss of hundreds of dollars in good will."

"Whenever a mean, small economy is proposed to me I tell the anecdote about the Scotchman who went into a barber shop and said:

"'How much for a haircut?"

"'Forty cents, sir,' said the barber."

"'How much for a shave?"

"'Twenty cents,'

"'Shave mah head.'"

### Monday's Municipal Election Results

The following are the results of Monday's municipal election:

For Councilman—Ahlgren 457.

Blow 705, Gaeta 69, Forsberg 139.

Hays 1084, Mattos 729, Mowday 1140, Rasmussen 141, Thelen 312.

For Chief of Police—Baldwin 69, Glavinovich 1710, Schmitt 786.

For City Attorney—Fraser 934, Hardie 1528.

For City Judge—Hare 820, Hickman 1220, O'Leary 373.

For School Board—Browne 1136, Fletcher 1199, Lindh 968, Teasdale 1359.

For School Board—Browne 1136, Fletcher 1199, Lindh 968, Teasdale 1359.

### Hydro-Electric Power Project Is Rapidly Developing

Progress on the Pacific Gas and Electric company's \$40,000,000 hydro-electric power project on the upper Mokelumne river, to be completed in 1932, giving the eastbay hundreds of thousands of additional horsepower for use in industry, has progressed rapidly, according to reports.

The Salt Springs dam on the upper reaches of the Mokelumne, one of the largest single factors of the project, is now two-thirds complete. At present a force of 600 men is employed at the dam.

At the junction of the Mokelumne and Tiger creek a construction camp to accommodate 200 men has just been completed, and crews are being mobilized there for the erection of a 68,000 horsepower electric generating plant. Preliminary work on the \$4,300,000 transmission line from the Mokelumne power plants to the Newark substation is now being carried on by a force of 150 men. At the substation 200 men are at work tripling the size of the plant to accommodate the additional power.

Elsewhere in the northern and central parts of the state the Pacific Gas and Electric company is pushing forward projects which will insure a greater supply of power in the near future, giving employment to thousands of men at this time in the development of its expansion and construction program.

Some of these projects and the number of men are:

San Francisco—Rebuilding of an 80,000 horsepower steam-electric plant, 250 men.

Rear river, Placer county—Enlarging of flumes and ditches to accommodate additional water for power and irrigation purposes; 300 men.

San Joaquin valley—Completion of natural gas transmission line and branch feeder lines, to make natural gas available to Sacramento valley, north bay and lower Redwood Empire cities and towns, 600 men.

Adjustment of gas appliances in Oakland and San Francisco; 1000 men employed with a payroll of more than \$5000 a day.

### DEFEATS DENEEN

Mrs. Ruth Hanna McCormick, congresswoman-at-large from Illinois, was nominated by the Republicans of that state for United States senator, defeating Senator Charles S. Deneen, who sought re-nomination. Mrs. McCormick is the daughter of the late Senator Hanna, and the widow of Senator Mark McCormick.

"I Saw It In THE TERMINAL"

**Stuffed up inside?**

Feen-a-mint is the answer. Cleansing action of smaller doses effective because you chew it. At your druggists—the safe and scientific laxative.

**Feen-a-mint FOR CONSTIPATION**

**Protection for the Whales**  
Threatened with extinction through the tremendous expansion of the modern whaling industry, whales have found a friend in the Norwegian parliament. Recent legislation puts restriction on all Norwegian whalers. The practice of paying whaling crews in accordance to the number of whales taken must be discontinued, and all parts of the animals containing oil must be utilized. Illegal catches are subject to confiscation.

**TOOK IT TO BUILD HER UP**

Strengthened by Lydia E. Pinkham's Vegetable Compound

La Junta, Colo.—"After my little daughter was born, one of my neighbors persuaded me to try Lydia E. Pinkham's Vegetable Compound to build me up. The first bottle made quite a change in me. I got an appetite and can sleep much better. I am not so nervous as I was. I have six children and do all my own work. I can do so much more now than I could when I began taking the Vegetable Compound and I shall certainly recommend your medicine whenever I have an opportunity."—Mrs. John Osborn, R. 2, Box 216, La Junta, Colorado.

**AS FIRST AID**  
Use Hanford's Balsam of Myrrh  
All ailments are authorized to refund your money for the first bottle if not suited.

**Success Logic**  
Charles F. Hissner, successful movie director who fought his way from a poor boy's home to a mansion in Beverly Hills by his own efforts, declares that the man who says, "I will do it," owns 51 per cent of the stock in the project he is undertaking. But he cannot stop there and win success. He must organize his work and himself, be prepared to take an occasional loss and only using his voting power to keep himself at the task.—Arkansas Gazette.

**Labor a Necessity**  
Work is the secret of true happiness. "Take away the occupation of all men," says John Burroughs, "and half the world will commit suicide within a year."—Grit.

**CALIFORNIA NEWS REVIEW**

Members of the building committee have let the contract for the upholstery work in the new Vallejo Veterans' Memorial building, now under construction, to E. V. Uffelman for \$1300.

Immediate organization of a local historical society with the aim of erecting and supplying a '49 historical museum was urged upon Grass Valley men by H. C. Peterson at the Grass Valley Rotary Club session.

A new gold strike was reported from the White River country, scene of the state's early great mining activities. Quartzite, assaying as high as \$125 a ton in gold and \$3.80 in silver, has been taken from the field by Dan Richardson and Bob Guthrie of Porterville.

B. B. Meek, state director of public works, and members of the California Highway Commission will be guests of the Fresno County Chambers of Commerce at Fresno the latter part of April. It was announced following a meeting of the board of directors of the chamber. A tour of inspection of San Joaquin Valley highways and the Kings River Canyon highway is planned by the commission in the same week.

The Contra Costa County Taxpayers' Association announced that efforts were being made to obtain a budget expert from the state association to assist in going over the Contra Costa County budget as it is being drafted this year.

According to a summary prepared by Captain C. W. Fisher, industrial manager of Mare Island, it appears there is no necessity of fearing a shortage of work at the yard. Reconditioning and scrapping of the thirty-four destroyers will continue for three months yet, providing a steady supply of work. There is yet seven months' work to be done toward the completion of the submarine V-6, while the cruiser Chicago, will not be finished for a year.

Spectators at the California State Fair will have the opportunity of seeing polo matches along with other entertainment. Construction of a turf field at the exhibition grounds has been announced by Charles W. Paine, secretary manager of the fair.

Martinez-Benicia Ferry & Transportation Company applied to the Railroad Commission for a certificate to operate a ferry over the Carquinez Straits between Martinez and Benicia for the transportation of vehicles and pedestrians. A franchise has been granted by the supervisors of Contra Costa County for such ferry operations. The firm has been operating a public ferry between these points for the last 15 years and desires a certificate for the purpose of protecting its operative rights.

Plans for the formation of a seven-county highway district to construct an improved highway from Yosemite Valley through Cottonwood pass to Morro Bay and Plano will be discussed at a meeting of county supervisors and members of the State Highway Commission at Fresno. Counties included in the project are Kings, San Luis Obispo, Kern, Fresno, Madera and Mariposa. Tulare County will also be asked to take part in the program.

Offices of the Healths Chamber of Commerce had been opened under management of Fred Cairns, late of Santa Cruz, newly appointed secretary. Though the organization has continued existence, offices have not been maintained for four months.

For the first time in nearly a decade the Nevada County Railroad, a narrow gauge line operating between Nevada City and Grass Valley, showed a net profit of \$8.82 on last year's operations in its annual report.

Gold still lures hundreds of seekers of the precious metal to California's foothill country and riverbeds, and the amount of metal recovered since the discovery cry was first heard in 1848 reaches the staggering total of \$1,832,071,329. Add there is plenty left in the hills and streams of California. Although there was a decline in the 1929 production due to the inactivity of lode mine and dredges, this year should witness a large increase as most of these operations, which represent some of the largest in the state are again operating. Amador County continues to lead the California counties in gold production. In 1928 this county produced a total of \$2,236,922. Figures for California gold production for 1929 are now being compiled for every producing county in the state.

A certificate of public convenience and necessity was granted by the Railroad Commission to A. W. Custer to operate auto trucking service for the transportation of property delivered to him by Railway Express Agency Inc., between Petaluma and Camp Meeker and intermediate points.

Fire Marshall L. A. Moore is in sympathy with lovers of California's golden poppy. Owners of empty lots where wild poppies have been planted may postpone cleaning them during the poppy season, he announced.

Pouring of concrete on the Petaluma-Ignacio reconstruction project in Sonoma County had been completed, with the exception of a half-mile stretch which is not being paved for the present.

The State Railroad Commission authorized the Coast Counties Gas and Electric Company to distribute natural gas in Walnut Creek, Byron and adjacent communities in Contra Costa County.

Bids will be opened at Corcoran for a \$15,000 combination fire house and city office building, according to C. E. Butner, Fresno architect.

Architect Harold Burket has been authorized by the County Board of Supervisors to proceed with working drawings for the first unit of the proposed Matilija Tuberculosis Preventionorium to rise in the Derby ranch section for Ventura county. The structure will be of Spanish type of architecture, one-story in height and of reinforced concrete construction. It will contain several wards, treatment rooms, dining rooms, kitchen, two classrooms, and is to cost from \$75,000 to \$85,000.

Second place in the national fire-prevention contest for cities of 20,000 and under has been awarded the Chula Vista fire department. More than 400 cities were in the class with Chula Vista. "Annual clean-up days have meant much in keeping down fire losses," said Charles E. Smith, Chula Vista fire chief, "and the schools are co-operating 100 per cent. The rigid inspection of buildings also has helped." In 1928 the per capita fire loss was \$140 and in 1929 it had been reduced to only 39 cents, according to Chief Smith.

Plans for the fourth annual water carnival and regatta to be held by the San Joaquin Water Carnival and Regatta Association were completed at a meeting in Stockton recently. Henry J. Colberg, president of the association, has been assured by the Outboard Motorboat Association of Northern California of an exceptionally fine outboard race program to be held on Stockton channel May 24 and the morning of the 25th. The affair will have as its motive the beginning of construction of Stockton's deep water channel to the sea.

After having been an employee of the Mare Island Navy Yard for a period of forty-one years on May 22, Fire Chief William J. Nolan will be retired, having reached the age limit of 65 years. Mr. Nolan has served as chief of the Mare Island fire department for nineteen years, and previous to that time he was employed in the machine shop of the yard. Following his retirement, Mr. Nolan will make his home in Vallejo. At present the family resides on Mare Island.

The Foster ranch mining acreage which has come down from the '49ers days, will be dredged by the South Yuba Company, Ltd., this summer. The mining ground is located in the Washington district, a few miles below Rocky Bar, where thousands of dollars were extracted by various mining methods in the past. W. D. Foster, original owner of the tract was consistently refused to sell for mining purposes. A large dredger has been trucked to the location and 2200 feet of 36x48 inch flume will be constructed to bring the water necessary for the operations. The job will take five carloads of lumber.

A 2,000,000 candle power airway beacon will be added to aviation safeguards of the bay district next fall, with completion of the Southern Pacific's new \$12,000,000 bridge across Suisun Bay, near Martinez. The company has applied to the aviation section of the Department of Commerce for approval of a lighting system for the structure. Besides the giant beacon, airway code lanterns and a marine lighting system for guidance of ships will be installed.

Protest against certain types of dangerous patients committed by courts to the state narcotic hospital at Spadra was made before Governor Young's council by Earl E. Jensen, director of institutions. In many instances, confirmed addicts with long criminal records sent to Spadra should have been sentenced to federal institutions, Mr. Jensen declared. "We continue to receive patients who, in our opinion, should never come to us," reported Jensen. "These cannot be benefited by treatment, as their record and history does not indicate a desire for cure. This is the type causing most of the trouble at Spadra."

Plans are under way to accommodate San Joaquin District Custodians Association to be held on May 17. State Superintendent of Public Instruction Kersey will be principal speaker. J. F. Swift, state president of the Custodians' association, will also speak. Custodians, school principals and superintendents and heads of Parent-Teacher associations of San Francisco, Oakland, Alameda, San Jose, Stockton, Modesto, Sacramento and Vallejo, will be present.

Martin Jansone, proprietor of a Richmond welding shop, is constructing an experimental launch of all-steel construction. Electric welding will be employed in place of rivets to put the ship together. The launch will be thirty-two feet long and will have a draft of three feet. It will be powered by a sixty-horsepower motor.

With installation of proper apparatus and appointment of Miss Pansy Bowen of Visalia as official weather observer for the Federal Department of Commerce, twenty-four-hour weather service has been inaugurated at the Visalia airport.

**Commune Center**

Bizarre Domes and Pinnacles of St. Basil's Cathedral Tower, Above the Red Square, Moscow.

(Prepared by the National Geographic Society, Washington, D. C.)  
**R**ED SQUARE, Moscow, is the very heart and symbol of Russia today.  
Lenin's temporary wooden mausoleum, a squat cube on the north side of the square, dwarfed by the towering wall behind, is a world shrine of Communism. Sentries stand guard and a double line of visitors waits to enter for a glimpse of the leader whose teachings still live. His body lies under glass. The dozen domes in spirals, facets and diamonds of yellow, blue, and green, shaped like inverted turnips, of St. Basil's cathedral, glisten in the sun.

Legend says that after Ivan IV, better known as the Terrible, started this barbaric gem, he had the Italian architect blinded so that it never could be duplicated. However, the first architects were Russian, though they did not survive the necessary 125 years to see the completion of their dream. The cathedral in which Napoleon stabled his horses is now a museum, and anybody, for ten cents, can lose himself in its eleven dark, little chapels and maze of narrow, winding tunnels. Through the centuries those bulbous, gaudy domes have looked down on the Red square, watching Russian history, just as they still rise serene as the square echoes to the tramp of Red army and Soviet workers and the blare of electric amplifiers as party orators hold forth on the platform of Lenin's tomb.

From the stone rostrum in front of the cathedral the ukases of the czars were read. Before its doors Peter the Great executed several hundred of the Strelitz, the old Muscovite militia. Here czars were proclaimed and pre-orders were killed. Across that square each proud emperor led the patriarch of the church on a donkey into the Kremlin, through the Spasskaya (Redeemer) gate, which no man entered from 1647 to 1917 without baring his head.

**Now Soviet Headquarters.**  
When the Ts. L. K., the "parliamentary committee" of Soviet Russia, holds its annual meetings, the various types that make up its membership meet inside the Kremlin in the Great palace. Most of the members cross Red square and enter Nikolskaya gate, taking the shortest path to the meeting place.

Two narrow sidewalks separate inside the Nikolskaya gate. One goes straight ahead along a low terrace outside the arsenal, on which are piled in pyramids the 875 cannons, French, Austrian, Prussian, Italian, captured when Napoleon wrote his epilogue in Moscow, in 1812. The other branches off to the left, on the opposite side of an open court, past the big white building, once the Palace of Justice and now the headquarters of the Ts. L. K., the seat of government.

It is a long walk, leading past ancient churches and palaces. The stacks of old muzzle-loading French cannon extend for a block, and then come the barracks, with a fringe of cannon of the museum vintage.

**Historic Bell.**  
Where the sidewalk skirts a corner of the old palace and comes out above the high wall overlooking the river, stands the great Car bell. Why it happens to be put there, hiding behind the corner, history does not explain. It has been there for 90 years, and probably will remain for several more. Carina Ann had it cast in 1735, and 101 years passed before it got out of the foundry which burned around it. A 200-ton bell, 66 feet in circumference, and 26 feet high, is not to be handled lightly. It has been raised on a stone foundation as high as a man's shoulders, and the broken-out chunk sits on the ground in front as if waiting for somebody to lift it back into place.

stained. Soldiers off duty, some with their wives or sweethearts and children, loaf along the sidewalk on top of the wall or sit on the window sills of the palace.

Two at the door ask each person who steps up to show a ticket, passing him with the familiar Pashalusta (please), a polite way of saying "Go ahead" in Russian.

Inside, the narrow entrance is finished in coffee-colored marble, and is neither as large nor as impressive as many hotels or railroad stations in the United States. When the delegates are meeting, a wooden stall covered with red bunting is on one side. From it supplies are distributed to each member, several volumes of bulky reports, a lead pencil, and pad of paper, not as generous as the "boodle bags" of American legislatures, which in years gone by, contained everything from a hairbrush and fountain pen to an annual railroad pass.

**Royal Pathway.**  
The main stairway which guests of royalty once eagerly mounted is narrow as palace steps go and has the same plain marble balustrade. It is covered with a red carpet, probably the one which the last Nicholas trod. At the top a narrow passageway on the right goes nowhere, and a broader one on the left leads into the former throne room, where the sessions are held. On the wall of the narrow passageway hangs Yvon's immense oil painting of the Battle of Kulikovo between the Russians and Tatars.

**Imposing Chamber.**  
To the right of the small reception room is the lofty St. George room, largest in the palace, 200 by 70 feet and 60 feet high, a vast room without a column to break its expanse of white marble. A regiment could stand in that room and airplanes fly overhead.

When the Ts. L. K. meets, St. George room is the stenographers' workroom. Half of it fenced off, with the Russian for "No Admittance" on the gate. Down one side are long wooden tables on sawhorse legs, where bobbed-haired secretaries write and smoke. On the other side are separate tables for members' conferences. Smaller tables are in the window seats in the open half of the hall. Those seated with the session can loaf, smoke, drink tea, or play chess.

Down a few steps from this room toward the old wing of the palace is the St. Vladimir room and the Red staircase, the latter once used only by royalties.

St. Andrew's hall, a long, narrow, vaulted, overdecorated room, 100 by 70 feet and 60 feet high, is the legislative seat of the Soviet government. Once it was the throne room, where the czars of all the Russias, after Peter the Great moved the capital to St. Petersburg, came for their second coronation, carrying out the tradition that a Muscovite ruler must be crowned in Moscow. In those days a throne stood in the farther end of the hall. For the first few sessions of the Ts. L. K., a curtain was dropped in front of the throne. Later special furniture in dark, stained wood was installed and a solid partition was erected to the lofty ceiling in front of the throne. In its center, the Soviet seal of sickle and hammer in red and gold flared the members.

**Various Types of Russians.**  
Where once staid princes and ambassadors the many types of Russians now sit. There are peasants and workmen in belted smocks, others in white collars, high boots, and low shoes; conventional-looking professional men; Mohammedans wearing black astrakhan fezzes; Mongols in flowing coats and fur caps with plush crowns; Caucasians with little embroidered skull caps; women, bareheaded, and with kerchiefs tightly wrapped around their heads.

**SIR WALTER RALEIGH** had a hunch that pipe-lovers would welcome some practical hints on how to take care of a pipe. It was a good hunch. Thousands of pipe-smokers have sent for this free booklet.

It tells you how to break in a new pipe—how to make a good pipe smoke smoother and sweeter—the proper way to clean a pipe—and many worth-while hints on pipe hygiene.

If you haven't sent for this booklet, write for a copy today and find out what pipe makers and pipe-lovers suggest doing to keep your pipe sweet and mellow. Just drop a line to the Brown & Williamson Tobacco Corporation, Louisville, Kentucky, Dept. 99.

Time in on "The Raleigh Review" every Friday, 10.00 to 11.00 P. M. (New York Time) over the N. B. C. coast-to-coast network of N. B. C.

**SIR WALTER RALEIGH**

**The Secret**  
William C. Durant, founder of General Motors, who lost his fortune years ago and is now a multimillionaire again, said to a New York reporter:

"You ask me how to succeed, but your own experiences must have taught you how already. To succeed be amiable. Show politeness and good-will to everybody everywhere." Then Mr. Durant summed up the matter neatly:

"Make friends and they'll make you."

**PAINS**

No matter how severe, you can always have immediate relief.

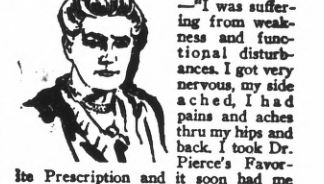

Bayer Aspirin stops pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

**BAYER ASPIRIN**

Popular Army Ditties  
Not for Publication

With the exception of a whiff of perfume, perhaps nothing can more rapidly call up a long-forgotten memory from the subconscious mind than the lilt of a song. Long after the present deluge of war novels has ceased and the controversy over their relative merits in depicting the facts forgotten, the men and women who saw, heard, tasted and smelled the great war at close quarters will find the only genuine echoes of those crowded years in the old army songs. If the British legion should take in hand, as is suggested, the compiling of a volume of those songs, along with the music, we predict for it a big and continuous sale. Unfortunately some of the songs were distinctly "unofficial." A complete and unexpurgated edition of many of the ditties that charmed the heroic ear might procure for the book a phenomenal sale, but even that anemic postwar Mrs. Grundy whom they have consigned to her death-bed would never permit the publication. And it is impossible to sing in asterisks.—London Post.

**"Nervous, Side Ached"**

San Jose, Calif.—"I was suffering from weakness and functional disturbances. I got very nervous, my side ached, I had pains and aches thru my hips and back. I took Dr. Pierce's Favorite Prescription and it soon had me feeling so well and strong that life seemed a pleasure where before I had very little comfort, either day or night. I think 'Favorite Prescription' is a most wonderful tonic for women."—Mrs. Arminda Brun, 1365 Shortway St. Fluid or tablets. All dealers.

Write the Faculty, Dr. Pierce's Invalids Hotel, Buffalo, N. Y., for free medical advice. Enclose 10c if you desire a trial of Prescription Tablets.

**Weighty Question**  
"Why do you carry a mortgage?" asked the bachelor.  
"Because I can't lift it," replied the married man.—Wisconsin Agriculturalist and Farmer.

**One-Man Sawmill**

Making it possible for the farmer to operate his own sawmill without employing other help, a one-man sawmill now is available to turn into profit much of the timber that formerly was used for firewood or wasted entirely. The mill is so arranged that all the levers to manipulate it are within easy reach of the operator and, aside from sawing out standard size lumber, will also cut shingles, lath and railroad ties. Stationary or portable mills may be obtained and both are operated by stationary engines, electric motors, water power, or by a belt from a truck. —Popular Mechanics Magazine.

**'Sa Hard Life**

"Pa," said the kid, "what is interest?"

"It's what you take in a girl and then pay on mortgages for the rest of your life, son," growled his dad. —Cincinnati Enquirer.

**Makes Life Sweeter**

Next time a coated tongue, fetid breath, or acid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Not acquainted with this perfect acid that helps the system keep sweet and sweet. That every stomach needs at times. Take it when the hearty meal brings any discomfort.

Phillips Milk of Magnesia has a scholarly endorsement. And as 4 millions of men and women didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

**PHILLIPS Milk of Magnesia**

W. N. U., San Francisco, No. 16-1930.

**Scraps of Humor**

BY VIRTUE OF NECESSITY

On a very stormy Wednesday evening the congregation who arrived for the mid-week service at the village church were the minister and John, the sexton.

The disappointed minister said: "Surely, John, if you and I could venture out in the storm, others should do so."

"Decd, sir," said John, "if you an' me wisna' paid for it we wuldn' be here, either!"

**NOT NEEDED NOW**

Jim—Do you still do your deep breathing exercises, old boy?

Nasium—I haven't recently, I'm rooming next to a tannery at present.

**Try This on Your Hearstring**

You're sweeter than jelly  
And softer than putty;  
Although you're no Shelley,  
You're certainly nutty.

**Thankful for Harp**

Crashing into a telegraph post, the motorist smashed his machine and was picked up in an unconscious state entangled in the wires.

Just as his friends feared the worst, a smile swept over his face and he was heard to murmur as he flung the wires, "Thank Heaven, they've given me a harp!"

**Fare's Fair**

"What's the fare," inquired the woman of the taxi driver, when he stopped at her destination.

"Two dollars, ma'am," was the prompt reply.

"Well, here's a dollar and a half—I'm not such a fool as I look."

"No," said the driver, "I wish you were, ma'am!"

**Necessary**

Traveler—In heaven's name, why did you come out in the middle of this dried-up, barren, God-forsaken prairie to build a home? There isn't a tree within a hundred miles of you.

Homesteader—Well, else could I do? The wife was dead set on learnin' to drive the car.

**Easy to Believe**

Mrs. Askem—Are you and your former husband still good friends?

The Grass Widow—Why, we are better friends than we were when we were married.

**WHEN IN THE VEIN**

**Words and Principles**

To words of public quarrels high principles you fix.  
And some of them are morals,  
And some are politics.

**Permanent as a Wave**

Spinks—These modern couples evidently would rather have a divorce than a golden wedding.

Jinks—Yes, it is getting so a wife gets as tired of keeping a husband as quickly as she does of keeping a diary.

**The Ayes Have It**

Blm—Do you think it right to buy an automobile on the installment plan?

Bam—Sure, 16,000,000 people can't be wrong.

**Stale Joke**

Finding his audience very difficult to please, a comedian cracked another joke and added, "I suppose you will laugh at that next year?"

"No," said a voice, "but we did last year."

**Agreement**

Saxophonist—I wish I had money and I would never play another note on the saxophone.

Neighbor—I wish I had money—I would give it to you.

**Dame Fashion Smiles**

By Grace Jewett Austin

What an inside-outside age this is. In many ways! Pajamas, which for a dozen or twenty years were supposed to be dedicated to home privacy, now have found a prominent place on boulevards. Some one started the fashion of wearing silk hose inside out, declaring that color, sheer quality and even wear were improved by doing that. At any rate, it can make another of life's simple and harmless experiments to have the fun of trying it.

Again this season one can have the pleasure of weighing her hat on a letter scale and finding how little postage it would take, if sent by mail. When the vison straws come in, a few years ago, they began this good habit of hats as light as the feathers of a pigeon. The bewitching hats of tulle, some with fluted brims, do not have weight, but must be babbled just a bit more than the straw hats, from the splash of the raindrops. Though there was never a genuine summer hat invented, unless made of rubber, which was improved by the baptism of a shower.

It is a big and generous age; bigger and better of nearly everything for women—even shoe-sizes! Though we may not admit it, and the shoe-makers with exceeding craft disguise it, the foot of many an American girl is larger than her mother's was, at the same age. Beards are growing larger, there is a vogue for the large party handkerchief, fur collars and scarfs are large and fluffy, and at some types of functions this summer there will be plenty of wide-brimmed hats.

Printed paper has always held an important part in the world's history since Gutenberg invented movable type. Now it looks as though printed silks are going to hold a high place for years in the history of women's clothes.

Some are always partial to dotted material, and while the polka-dotted gown does not appear to be cast this summer for such an important part in the dress drama as in some recent years, yet it will duly appear on the summer stage. The wee pin-dots, not so frequent of late, are also in the mode for this season.

With a pretty printed silk or two, a wool or wool-and-silk suit, and a dinner dress or two, one could travel across the continent or around the world, with a calm spirit.

The fully tailored suit is one of the aristocrats of the world, so far as women's clothes are concerned. There are suggestions that some of the customs long present in men's wear, such as padded shoulders, may be seen in women's suits and give the essence of correctness. The minute one begins to talk of a "military silhouette," even the placing of buttons on a jacket, the number of buttons, and the grave matter as to whether the coat shall be single or double-breasted, assume importance.

But that swinging pendulum should not be forgotten. If one chooses to be severe and military in suit-time, in hours of ease there is opportunity for floating flounces, dipping sleeve lines—or even for deep fringe. To Dame Fashion fringe always seems the last word in femininity. Men may wear many things affected also by women, but did any man of style ever appear with fringe? So here, at any rate, is one stronghold sacred to women.

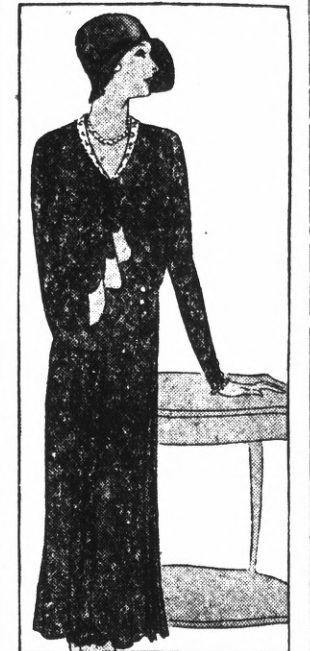

(© 1930. Western Newspaper Union.)

**Dainty Green Challis, Short Puffed Sleeves**

Showing a charming costume for a little miss. It is constructed of green challis, with short puffed sleeves and a double collar. An appropriate little hat, patent-leather shoes and half hose of white complete the outfit.

**Print for After Fifty May Be Very Becoming**

After one is fifty, says the Woman's Home Companion, a waistline just an inch or so below the normal may be very becoming if it is topped with a slight bloused effect and finished by a yoke belt about five inches wide. This is the way the frock illustrated interprets the Paris mode for the older woman and for good measure of becomingness it adds a surprise jabot. It is a practical dress for the all-day print.

**Crepe and Satin Rank High for Sports Wear**

The Riviera now is sparkling with white—the white of wool coats, crepe and satin dresses, ermine and fox furs. The sleeveless dress of white flounces again in shantung, in marocain, and even in satin.

White crepe satin makes a stunning sports dress, stitched and buckled for an interesting note of fabric contrast. Incrusted bands of self-material zigzag across the front and back to parallel a slanting inset of box pleats on one side of the skirt. There are no sleeves, but the neck is high, round and collared.

In addition to white wool coats there are clever ones of white cloy or moutarde, which is seen also in colors. In autumn brown, this fabric makes a smart top coat for either a brown crepe dress or the white one.

Green will be a predominant spring and summer color if Riviera events cast their shadows before. Light greens dot the tennis courts at Cannes, and dark greens, even to the deep bottle shade, are worn on the terraces at Monte Carlo in more formal models.

The bright, short coat of plain wool with the mixture dress of tweed or jersey is important in resort wear, the costume completed by a hat almost certain to match the jacket, usually a beret, small, tight and consummate-ly draped.

In evening dress the big black bow is anything but inconspicuous, its position varying but its size remaining among the large things of life. Most often it appears centered at the back of the waist, but occasionally it drops down to the back of the knee.

Contrasting with the bouffant evening gown is the straight-line dress, made of such fabric as white georgette with a stirred bodice strapped vertically in self-material, and a long straight hanging full skirt formed of a succession of shaped panels pointed at the hem.

**Larger Gloves Are Worn; Milady Prefers Comfort**

Glove manufacturers tell us that our hands are growing larger, basing their statement on the fact that while size 6 gloves were formerly in great demand this size is now far less usually required than 6½, and the number of women who unabashedly ask for size 7 is steadily increasing, notes a fashion writer in the Boston Herald.

Undoubtedly hands of American women are increasing in size because it is an uncontested fact that the average stature of women is greater in this generation than in the last. If your daughter is an inch or so taller than you are you should not be surprised to learn that she wears gloves a size or so larger.

Probably the most significant factor in this apparent increase in glove sizes is the fact that women no longer wear gloves that are too small. No up-to-date woman has patience to put on gloves that need to be coaxed into position. She wants gloves that can be slipped on in a casual sort of way, and she feels, too, that her hands actually appear smaller and better proportioned if gloves are large enough to be worn easily.

**Scrumptious Scarfs**

The scarfs which London women wear these days are hand painted in designs of stars and other objects never glimpsed on land, sea or in the sky. But they are beautiful with their striking designs and coloring. Upon one of the fantastic painted figures you are likely to find also painted the initial of the wearer's first name.

**DADDY'S EVENING FAIRY TALE**

By Mary Graham Bonner

**SIGHT SEEING**

David, who was adventuring through South Africa, made his way south-west.

Rising behind Cape Town he saw the Devil's Peak and the Table Mountain.

He particularly liked the Table Mountain with its long flat top often hidden by its tablecloth of low hanging clouds, and David thought it would be a nice feeling to live where a mountain top was almost always ready for a meal to be put upon its table.

Near the Cape of Good Hope he saw vineyards and was given some delicious jelly.

He saw the snow mountains, too, but after he had wandered about a little he thought he would take a nap.

It was fine to adventure but every once in a while one had to take a nap so as to be ready for the next one.

So that was what he decided to do now.

When David awoke in the morning he could hear the Cape of Good Hope, right at the top end of Africa, below Cape Town, singing. He found some breakfast ready for him, a breakfast much as he might have had at home though he thought the fruit unusually delicious.

And then he listened to the song of the Cape of Good Hope:

Storms great, oh, my!  
Gales are so high,  
Rough seas so mighty,  
Oceans so flighty.

I see it all,  
Nothing is small,  
Around these gay parts  
For wild ocean hearts.

Waves so unsteady  
I'm quite heady  
You never can tell  
When I'll roar and yell.

Cape of Good Hope  
Never does nope,  
The Cape of Good Hope  
It never does nope.

It was then that David saw the Cape. He reminded David somewhat of Cape Horn, so wild looking, and boasting to himself, talking against meek low lands.

"Hello, David," he said, finally. "Isn't this nice where I am? I go right off here into the Atlantic Ocean."

"How did you get your name?" David asked. "It seems a funny name for so wild a looking creature—and yet maybe it's a good name—I don't know."

"Well, if you don't know, I'll tell you, but I'll tell you the truth. There are some who might tell you differently, when they found out you didn't know anything at all, but not this Cape."

"They named me this to cheer them up when the storms were bad."

"But I must tell you, too, that in this colony around here there are wonderful ostrich farms. I don't suppose they'd interest you though your mother might be interested—people in your land are supposed to want them more than any others."

And David went to visit the ostrich farms. "It was certainly a very fine sight!"

**RIDDLES**

All set for some more riddles? These ought to put wrinkles in your brow!

1. When is a barrel hungry?
2. Why is a stiff man like frozen water?
3. Why, when you paint a person's portrait, do you steal part of his body?
4. What would you do if you woke up at night and wanted a light?
5. How do doctors resemble ducks?

**Answers.**

1. When it takes a roll. 2. Because he can't run. 3. Because you make his features (feet yours). 4. Pick up a feather—that's light enough for anybody. 5. In their bills.

**Comment Reversed**

Father—What do you think of a man that throws a banana skin on the footpath?

Son—I don't know. What do you think of a banana skin that throws a man on the footpath?

**Correct**

The class was being questioned on the cardinal point of the compass. Teacher—If I turn to the east, and look at the rising sun, what is behind me?

Boy—Ter shadder.

**Doctor's PRESCRIPTION when system is sluggish; costs nothing to try**

When your bowels need help, the mildest thing that will do the work is always the sensible choice. Take a laxative that a family doctor has used for all sorts of cases of constipation. Dr. Caldwell's Syrup Pepsin is so pleasant to the taste, so gentle in its action, it is given children of tender age and yet it is just as thorough and effective as stronger preparations. Pure senna, and harmless laxative herbs; ingredients that soon start a gentle muscular action. Avoid a coated tongue, bad breath, bilious headaches, etc. Every drug store has Dr. Caldwell's famous prescription in big bottles. Or just write Dr. Caldwell's Syrup Pepsin, Monticello, Ill., for a free trial bottle.

**The Complete Skin Treatment Cuticura**

Consistent use of Cuticura preparations will do much to make—and keep—your skin healthy and clear.

Soap Ointment Talcum

Would Cost Millions

Railroad crossings are classified according to the extent and nature of the traffic on both railroads and highways and the cost of elimination estimated. Class A, number, 1,072; cost of elimination, \$281,810,000. Class B, number, 2,548; cost of elimination, \$168,760,000. Class C, number, 2,084; cost of elimination, \$155,325,000.

Experience is a dear teacher and war is her foremost assistant.

Money talks even in keeping a whisky still.

**Rare Bird**

"He's a peculiar chap. Has a conscience that's always hitting on all six."

"Yes, he never thinks the umbrella loaned him is a straight-out gift." —Cincinnati Enquirer.

**Sure**

He—What would you think if I put my arm around you?

She—What would I think if you didn't?

Work is not the secret of happiness; it is the secret of forgetting unhappiness.

**Restless Children**

Children will fret, often for no apparent reason. But there's always one sure way to comfort a restless, fretful child. Castoria! Harmless as the recipe on the wrapper; mild and bland as its tastes. But its gentle action soothes a youngster more surely than some powerful medicine that is meant for the stronger systems of adults.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is any need. In cases of colic, diarrhea, or similar disturbance, it is invaluable. But it has everyday uses all mothers should understand. A coated tongue calls for a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed to set everything to rights. Genuine Castoria has Chas. H. Fletcher's signature on the wrapper. Doctors prescribe it.

**Venerable Legionnaire**

In Otis C. West the Rogers Park Chicago post of the American Legion claims the oldest legionnaire in the country. West will be eighty on May 28, his next birthday. He had retired from the army after thirty years of service, during which he never answered sick call or was in the guardhouse, and when he joined the army at the outbreak of the World war, at the age of sixty-seven, he had to have special permission from the War Department.

**Cheaper Railroad Ties**

Metal railroad ties from used rails are coming. The General Electric company can make them for 60 cents, says Capper's Weekly. Wooden ties cost \$2.80. The scrap value of the metal, however, is \$2.50, but this still may be recovered whenever a metal tie is discarded. One eastern railroad will adopt the new ties, which are economical and will save our dwindling supply of timber. They will go to make a more substantial roadbed on which before many years trains may run at a speed of from 100 to 200 miles an hour.

**Reason must be above passion.**

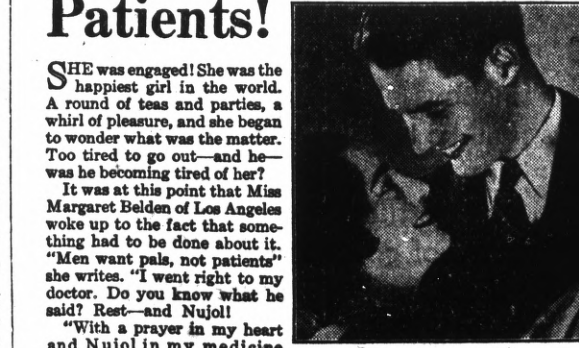

**Says Men Want Pals, Not Patients!**

**SHE** was engaged! She was the happiest girl in the world. A round of teas and parties, a whirl of pleasure, and she began to wonder what was the matter. Too tired to go out—and he was becoming tired of her?

It was at this point that Miss Margaret Belden of Los Angeles woke up to the fact that something had to be done about it. "Men want pals, not patients," she writes. "I went right to my doctor. Do you know what he said? Rest—and Nujol!"

"With a prayer in my heart and Nujol in my medicine cabinet I began to fight back to being the healthy, robust, happy girl I had been before. Two months passed. No more tears—no more worrying, no more bad dreams. Today I beat him on the tennis court, and although he can out-swim me, I make him work doing it. It's good to be happy. It's good to be free, physically, and be able to share, any time, in sports or dancing or anything else with the one you love!"

Here's another one who has learned that the simplest and surest way to be well and full of good spirits is to clear the bodily poisons out of your system regularly. Not with power-

ful drugs, but normally, naturally, easily. Doctors and nurses recommend such a natural treatment as Nujol, because this crystal-clear liquid isn't a medicine at all! It can't harm even a little baby! It contains absolutely no drugs. It is simply internal lubrication that your body needs like any other machine. Good looks and good spirits—do they spell popularity? You know they do! Get a bottle of Nujol tonight in any drug store. Sold in sealed packages only—trademarked "Nujol." Insist on Nujol by name. It costs but a few cents—and it will make you feel like a million dollars.

## When Armies Meet in Battle on Chessboard

The principles of chess are based on the struggle of every-day life. It is a battle between two armies of equal strength, fought on a field of 64 squares. Victory usually comes on the more proficient of the two generals in command. In a technical sense, the capture of the opposing king is not permitted, yet when the capture is inevitable, the game is ended. This fact seems to escape the recognition of many players, who direct their entire energies to the capture of pieces or pawns when consistent play would indicate an easy road to victory through the medium of a checkmate. The temptation to proceed with the attack before all the pawns are in the field is a great one, but such premature attacks are usually abortive and frequently result in disaster. Chess literature abounds in examples of games in which disaster and defeat were a direct consequence of the failure to develop properly one or another of the pieces.—Exchange.

## Florid Epitaph Common in Revolutionary Days

"Stop, Passenger," began an epitaph, dated 1781, on a stone in a cemetery in Ellanbeth, N. J. "There lies the remains of a woman who exhibited to the world a bright constellation of the female virtues. On that memorable day, never to be forgotten when a British foe invaded this fair village and fired even the temple of the Deity, this peaceful daughter of Heaven retired to her hallowed apartment, imploring Heaven for the pardon of her enemies. In that sacred moment she was by the bloody hand of a British ruffian dispatched like her living lie-downer through a path of blood to her long wished-for native skies." There were few brief epitaphs in those early days. It was apparently regarded as a lack of reverence to fail to enumerate the virtues of the departed, and as a disregard of opportunity to fail to warn the "passenger" of what was in store for them.

## Quantities of Amber Found in Baltic Basin

Amber has been mined for hundreds of years in the so-called blue earth of the Baltic basin. It is classified as a fossil resin and geologists believe that several species of pines have had a part in the formation of the amber of the Baltic basin. Pieces of amber are torn from the sea floor and cast up by the waves. They are collected at ebb tide by searchers who sometimes wade into the sea and with nets attached to long poles drag to the beach the seaweed containing entangled masses of amber. Dredges have also been used. Lithuanian raw amber is the property of the government. Each finder has to deliver the pieces to administrators of the state's central deposits of amber. Failure to do so leads to a charge of embezzlement. Amber has found its greatest use in the fashioning of ornaments. Artisans who make necklaces, bracelets and brooches turn the amber on a lathe and polish it with whiting and water, or with stone and oil, the final luster being imparted by friction with flannel.—New York Times.

## Blowing Hot and Cold

Doctor Blossom says that heat is measured as time is measured, only by its loss. When you blow through nearly closed lips the breath is expelled so rapidly that passing over the hand it cools it by evaporating the perspiration from the skin, whereas when you breathe upon it more gently from the open mouth the hand is surrounded by the warm air, and hence feels hot. If a thermometer were used instead of the hand, the two cases would be the same, or often the reverse, because the thermometer has no moist skin and registers the actual temperature instead of merely changes of temperature.

## Facts About the Telephone

Only 14 per cent of the world's telephones are out of reach of the American system.

The number of telephones in the United States is increasing at the rate of about \$90,000 annually.

The American people are estimated to send more than 27,000,000 messages over the telephone in the course of a year.

The Bell Telephone Company of Canada plans to spend over \$20,000,000 for new telephone construction in Ontario and Quebec, this year.

There are now about 77,000,000 miles of telephone wire in the United States compared with 67,250,000 miles the year before.

651,000 telephones were in service in the Michigan Bell Telephone Company last year; 152,000 telephones have been added during the past three years.

A special telephone exchange and other communication facilities have been installed in the guard room of St. James' Palace, for the use of delegates to the Naval Conference in London.

Transatlantic telephone service between the United States and Italy was inaugurated August 28, when members of the New York banking firm of Wertheim & Co. talked to Milan Service to all northern Italy and to Rome is available now to the entire United States.

Freight trains are now run on strict schedules corresponding to those applied to passenger service. These freight trains are controlled by telephone and telegraph, and conductors, engineers, and yardmasters must account as closely for any delay as they would in case of passenger trains.

NEWSPAPERMAN GOES SOUTH Frank B. Schumann, for several years city editor of the Richmond Record left with his family for Kentucky. They will visit relatives for a few weeks and then go on to North Carolina where Schumann will become the managing editor of a daily newspaper, for the purchase of which he will open negotiations immediately upon arrival.

"THE TERMINAL" can print it for you. Call up Richmond 132.

FRIDAY, APRIL 18, 1930

## INTERSECTIONS GREATEST

HAZARD  
If a careless act of yours should ever result in the taking of a human life, you will never forget it. Even though the accident is what is called "unavoidable," the memory will stay with you. You will never be able to forget that you have blotted out a human life and probably, in your heart of hearts, you will never be able to forgive yourself. Look both ways at every intersection, keep your eyes on the road ahead, and think twice before you step on the throttle. Drive carefully yourself, and spread the spirit of safety that has kept you from becoming injured, and that has kept you from injuring another. Your very carefulness may serve to inspire caution in others, and will also serve as a constant reminder to yourself.—Pittsburg Post.  
Intersections, especially where the view is obstructed by buildings, are a menace, and a larger percentage of accidents are due to the younger and more daring drivers, who take a chance in speeding at these hazardous places. Go slow at intersections. Get this habit. You will then be safe, and save the other fellow also.

## RECREATION GROUNDS

While nearly every progressive community is making additional recreational facilities, occasionally a board of directors is turned down although the amount of taxes to pay for the improvement is less than a penny on a hundred.

The Pittsburg Post makes a point here as applied to that flourishing California city. The Post says:

"Cities which lack suitable recreational facilities are not properly attending to the needs of their young people. The average boy or girl would rather play baseball, or tennis or golf, or go swimming than spend his or her time in idleness or worse."

"Otis Loveridge made a suggestion Tuesday night at the Pittsburg Men's Club which should be carefully considered by every thinking person. He pointed out that Pittsburg needs tennis courts and similar public recreational facilities if the youth are to be kept from various forms of vice. There are so many methods of parking a bit of money here and there from a city budget that the cost of a good playground need not prove a stumbling block. It would pay for itself many times over if only from the standpoint of community health."

## COMPARATIVE FIGURES FOR NEW INDUSTRIES

Although the country had 126 new industries in 1928, and 118 in 1929, the industries for 1929 were generally larger as is evidenced by the fact that the total amount of investment by the 118 industries located in 1929 was \$5,750,000, as against \$4,540,000 for the 126 new industries which located in 1928. Payrolls and number of employees increased in proportion. During 1929 the payroll increased \$4,000,000 as against \$3,096,000 for 1928, while 2500 new employees were added to the payroll in 1929 as against 1920 in 1928.

## THE Gorgeous Scenic Spots of all CALIFORNIA

Mrs. Lillie Whistler, San Pablo.  
Frank Silva, San Pablo. Jan.31-610

FOR SALE—250 White Leghorn pullets; 75c each. Phone Richmond 521-W.

Sophisticated Boyhood  
It may be the age in which we are living that is responsible. You can't tell. But in the light of observation the sophistication of the nine-year-old becomes an actuality.

Witness the following:  
A window display of a tire house. Toy automobiles scooting around at an amazing speed. Crowd composed almost entirely of adults peering with obvious amusement.

Two urchins approach from the background. One of them elbows his way to the front. The other is not so successful.

"What is it?" yells the one from the back.  
"Aw, just a tire advertisement," says the other with disgust.

## "Spring Platter" for Congressmen

Representatives Alamy of North Carolina, Purnell of Indiana and Britton of Illinois enjoying the "spring platter" introduced in restaurants in the Capitol by Dr. G. W. Carver, congressional physician, and warranted to tone up the systems of the lawmakers. The platter consists of: Mold of tomato soup served with raw carrots, cabbage chopped small, rye toast, cream cheese, baked apple and choice of drinks.

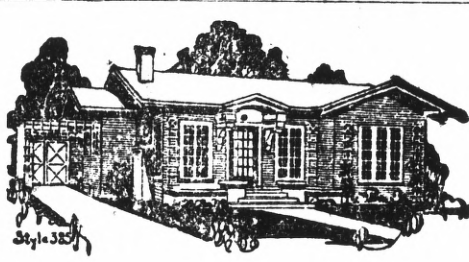

You can always depend upon our examinations. We will tell you if your eyes need a doctor's care or whether glasses will remedy your trouble—if the latter we will fit you scientifically and economically.

## Charter Discussion Planned For May

THE aggressive citizens of Richmond are advocating a mammoth mass meeting to be called in the near future. The object of the meeting is to discuss in the open a number of problems confronting the city, and to give able and conservative speakers an opportunity to say what our city needs. There isn't any doubt about Richmond's future. The city is growing despite its conspicuous handicaps.

Our sources of growth are so powerful and so many that the dragging influence of an incubus of politics in the interests of a clique will be thrown off quickly. With our present city charter nothing can be accomplished in giving the people a modern and economical form of government. The People are paying war prices for it; are they getting it?

**Boost the Charter Movement!**  
By THE COMMITTEE.
